

## **Humber LEP Scheme of Delegation**

As the governing body the LEP Board is itself responsible for approving corporate strategy and associated plans and budgets; for determining major business decisions and strategic policy; for the framework of governance and management; and for monitoring executive performance.

However, we have delegated authority for programme management and delivery to the LEP's three main sub boards: Business Development, Investment and Regulation and Employment and Skills.

These Boards will have a role in prioritising, making decision on the projects to support and in monitoring performance. All future programmes will be set within the framework of the role of these Boards and they will have delegated authority to approve individual projects. For Capital projects the threshold is set at £2million over the life time of the project and for Revenue projects it is set at £1million over the life time of the project. Any projects over these values will need to be presented to the main LEP Board for approval.

In addition, each Board may be allocated revenue funding for operation purposes and decisions on the use of these funds would be delegated to the Boards.
